Pumping Water Pumping Honor

Company profile

Nanfang Pump Industry Co.,Ltd (CNP),as a subsidiary of Nanfang Zhongjin Environment Co.,Ltd, was founded in 1991,and listed on Shenzhen Stock Exchange on December 9,2010 with stock code 300145.

In 2019, CNP's annual output exceeded 900,000 units/set with nearly 3 billion sales revenue, continuing to maintain high growth. As a national enterprise technology center, CNP has flagship ultra-high efficient product -new generation CDM (F) light vertical multistage centrifugal pump, $MEI \geq 0.7$. Same series high temperature pump products are developed in 2019 to satisfy high temperature applications. All light stainless steel pump product series grow stably.Advanced frequency conversion water supply equipment has been innovated to the 6th generation. Fire pump and diesel engine have obtained UL certification.TD in-line pump, NIS/NISO end suction pump, NSC split casing pump, WQ sewage pump, PQ stainless steel fountain submersible pump, BP silent tube pump, pool pump, non-blocking self-priming sewage pump, metering pump, oil pump and other pump products, can meet various application needs of different fields.

CNP has a complete sales network both in domestic and overseas market,exporting to over 60 countries and regions, maintaining long<g relationship with our clients. CNP pumps have been widely applied in various fields like water treatment、water supply and drainage、 HVAC、 industrial application、 seawater desalination、 energy and power etc.

CNP, a green water expert beside you.

Model definition

Structure features

- MS/MSS series of pump is single-stage centrifugal pump and features axial suction and radial discharge.
- Compact structure, the pump is directly connected with the motor, coaxial installation.
 - Convenient installation screw thread water inlet and outlet.
 - Light weight, thin plate pressing structure for main parts and components.
 - A little corrosion resistance, material of wet parts is AISI 304 or AISI 316 stainless steel.

Application

- Pressurization and pumping of industrial and civilian clean water or other liquids
- Water treatment
- Water circulating system
- Agricultural irrigation
- Other fields

Pumping liquids

- Thin, clean, non-flammable and explosive, not containing the liquid with solid particle and fiber.
- Able to transmit light corrosive medium(Relate to the content of chloride ion in the medium, thickness of acid or alkali, whether generate corrosion on the rubber and mechanical seal materials).
- The density of transmitted medium is less than that of clean water viscosity close to that of water. Otherwise the motor of large power is required

Operating condition

- Liquid temperature: -10°C~+ 85°C
- Ambient temperature:up to +40°C
- Altitude: up to 1000m
- Max. pressure of the system is 8 bar

Motor

- TEFC motor,2-pole;
- Protection class: Ip55;
- Insulation class:F;
- Standard voltage:50Hz 1×220v
3×380V/3×220V
- Standard voltage:60Hz 1×220V
3×380V/3×220V

Installation requiremen

- The pump shall be fastened on the stable horizontal base.
- The installation of the pump shall ensure that the pump will not be influenced by the tension of the pipeline.
- The pump shall be installed on the ventilating and anti-freezing place to ensure normal operation of the motor.
- Electric wiring device shall guarantee that the pump will not be damaged by lack of phase, unstable voltage current leakage and overload.

Curves

- Include performance curve in the technical data:
- All curves are based on the measured values of 50Hz: constant motor speed 2850r/min, 60 Hz: constant motor speed 3450r/min.
 - Measurement is done with 20°C air-free water, kinematic viscosity of 1mm² /sec.
 - Curve tolerance in conformity to ISO9906: 2012 Grade 3B.
 - The operation of pump shall refer to the performance region to prevent overload of motor due to too large flow rate.
